

We market our products in many countries of the world. Again and again we and our partners in the field receive interesting reports from dairy farmers and scientists. We are happy to process this information to you and hope that you will find it helpful. Send us your suggestions – we count on them to help us give you a better product!

Many thanks, your KRAIBURG Team

ISSUE 35 - January 2016

PARLOUR RENOVATION

The light coloured, coated floor in the parlour of the Jerg farm had slowly become slippery and cracked, due to many years of usage. Renovating with asphalt or other coverings would have made the parlour unusable for a long time. Mr. Jerg decided to renovate with KURA Flex rubber mats, which can be installed easily in between two milking times.

PROFILE:

- 85 dairy cows
- paved / concrete walkways with KURA P
- KURA Flex in the parlour

KURA Flex:

- for paved / concrete floors without scraper
- with puzzle shaped edges on 2, 3 or 4 sides in various dimensions

Before renovation

KURA Flex mats were installed in the parlour:

the parlour is completely...

...covered with the mats

where necessary, mats are cut to fit not required puzzle pieces at the end of an area are cut off

then the mats are fastened with nail plugs

the renovated parlour is ready for use again

Depending on situation / requirements, there are various installation options:

- using the floating method (with no fastenings)
- one-sided fastening to wall / pit
- "all around" fastening (complete surface is fastened)
